

Mounting instruction: Skamol Corner

1 Prepare SkamoEnclosure Board.

2 Mix and apply Skamol Structural Plaster or Skamol Smooth Plaster, where Skamol Corner is placed.

3 Clip Skamol Corner into the plaster. Even out excess plaster.

Application

Skamol Corner is used as a protector at corner joints.

Skamol Corner is made from PVC, which expands in the same way as the SkamoEnclosure Board, thereby avoiding cracking in the plaster.

- A** Remove dust from the surface of the SkamoEnclosure Board.
- B** Apply Skamol Primer to the surface of the SkamoEnclosure Board where Skamol Corner is to be applied.
- C** Skamol Corner is shortened to the desired length. This is easily done with a nipper or scissor.
- D** Apply a thin layer of Skamol Structural Plaster or Skamol Smooth Plaster, where Skamol Corner is placed.
- E** Squeeze Skamol Corner into the plaster.
- F** Excess plaster is evened out with a filling knife.
- G** After 30 minutes, Skamol Structural Plaster or Skamol Smooth Plaster can be applied to the entire surface.
